DETAILED ACTION

1. After careful review of claims 1-7, 9-19 and 21-35 examiner has withdrawn the rejection as stated in previous Final Rejection because regarding the claims applicant's argument is persuasive.

Reasons for Allowance

2. Claims 1-7, 9-19 and 21-35 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1, 13 and 25, the prior art references **Gregorek** and **Grossman** fails to teach a called party device user selecting one of a plurality of predefined messages after the called party device is in telephone call communication with a second calling party device while placing the first calling party device on hold. **Gregorek** teaches placing a first calling party on hold after a called party accepting a telephone call from a second calling party and during the call a pre-selected message is being transmitted to the first calling party. **Grossman** teaches an agent [i.e., called party] presses a selected key and an audible indication corresponding to the key pressed is transmitted to a calling party placed on hold. Therefore, it is not obvious to combine **Gregorek** by the teaching of **Grossman** to teach a called party selecting a message from a plurality of predefined messages during the telephone call connection with the second called party. Since, a talk path is not established between the called party and second calling party before the called party making any selection of key input in case of **Grossman's** invention and **Grossman's** invention does not need to have any telephone call link with the second calling party.
